

Touchless Soap Dispenser

Modernized, worry-free hand cleaning

About this product

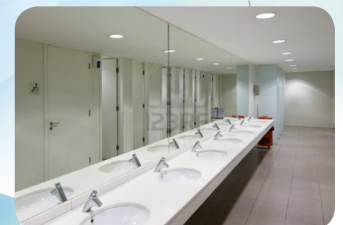

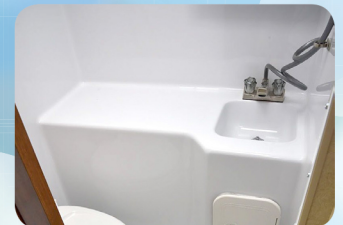

Soap dispensers in public restrooms with a "push" mechanism are a haven for bacteria. Hundreds of people use them every day in high traffic areas, which only increases the need for them to be wiped down after use. With the continuously increasing demand for more sanitary hand hygiene procedures, Dustbane is excited to offer a touchless soap dispenser with a sleek look to compliment any decor in any facility. Its' durable material and easy to install build makes it the perfect alternative for traditional soap dispensers. Available in separate foaming and lotion formats.

- Easy to refill and clean
- Uses less solution
- Effectively avoids germs or infection without making physical contact with dispenser
- A convenient, safer alternative to traditional soap dispensers
- Designed to fit the decor of any area
- Dispenses the perfect amount of soap for regular handwashing
- Cost effective – get up to 2,500 handwashes on a full reservoir (foaming only)
- On/off switch to prevent accidental dispenses during refill

Need the soap to go with it?

Our ECOLOGO® certified hand cleaners, Tradition and Tradition Plus offer a rich lathering, mild formula that leaves hands feeling smooth and soft. Their pleasant scent and deep cleaning properties make them the perfect product to use with any refillable soap dispenser.
