

The UniVac™ system is a compact adaptation of Kaivac's multi award-winning Dispense-and-Vac system. This one-fill "no-mop" cleaning machine offers a simple approach to cleaner, safer floors in a nimble single-piece package, ideal for congested areas with limited storage. Its extreme cleaning capabilities enable hygienic results in even the heaviest soil and grease conditions, leaving floors really clean and bone dry.

PERFECT FOR:

Kitchen Cleaning and Degreasing
Restroom Floors
Industrial Floors
Grouted Floors
Entrance Ways
Spill Pick-up
Flood and Salt Pick-up

Power Options:
Quick-change Lithium-ion
Power Pack (shown here)
or GFCI Electrical
Extension Cord

NOW AVAILABLE
WITH SMART BATTERY
TECHNOLOGY!

HIGHLIGHTS

- Up to 60 times better at removing soil and contaminants than mopping
- Reduces cleaning times and chemical costs while producing better results
- Reduces the risk of costly slips and falls
- Optimized for high grease environments like food service and industrial facilities
- Cuts water use by up to 75%
- Reduces chemical use by two-thirds or more
- Easy to maintain and repair — no technician needed

LIFETIME WARRANTY

Exclusive use of Kaivac's specially formulated low-foaming sustainable cleaning chemicals increases the effectiveness and life span of our machines, so we offer a lifetime warranty on our Vacuum Motor!

Why is UniVac™ Better?

Stop the Mop for Cleaner, Safer Floors

Floors can be difficult and expensive to maintain. If not cared for properly, they not only become unsightly, they can drive customers away, cause slip and fall accidents, and even become a health hazard. Unfortunately, traditional mopping can make matters worse – especially for grouted floors. In fact, during mopping, grout lines actually “squeegee” soil, grease and soap scum from mops. When the water evaporates, soils, mineral deposits, soap scum and potentially harmful biopollutants are left to penetrate and coat the porous grout. Grout lines become stained, darkened and unhealthy.

The UniVac system offers a practical, low cost “no-mop” solution to this expensive problem.

Conserve Water, Chemical and Labor

The UniVac’s unique one-fill capability allows the cleaning solution to be filtered and reused with no loss of cleaning effectiveness. Many users choose this option in order to conserve water, reduce chemical usage and improve productivity.

Univac Includes:

Battery-powered Model:

- Wet Vacuum with Built-in Spigot and DC Motor
- Lithium-ion 36V DC Quick-change Power Pack
- Battery Charger
- One-piece Aluminum Vacuum Wand with Squeegee Head
- 7.5 ft. (2.3 m) Crush-proof Vacuum Hose
- Speed Scrubber
- 7 Blue Scrubber Pads

Corded Model:

- Wet Vacuum with Built-in Spigot and AC Motor
- Electrical Extension Cord with GFCI
- One-piece Aluminum Vacuum Wand with Squeegee Head
- 25 ft. (7.6 m) Crush-proof Vacuum Hose
- Speed Scrubber
- 7 Blue Scrubber Pads

Easy, Fast, Convenient

Dispense solution through the throttle spigot on the rear of the system.

Rapidly spread solution across floor with the Ergo Speed Scrubber.

Vacuum soils and water away leaving surfaces clean and dry.

Vacuum under fixtures, shelves and seating with the versatile vac wand.
