

Dustbane's Green Footprint

To promote greater effectiveness and continual improvements of our environmental investments and activities, Dustbane has introduced an environmental logo. Its purpose is to help people become aware of our improvements and learn what we have to offer. Products that fulfill the requirements will benefit both business and consumers, by enhancing product quality and environmental protection.

UL ECOLOGO Program

In April 2013, the mark agreement between Environment Canada and EcoLogo ended. UL Environment took the opportunity to carry the familiar ECOLOGO name forward, thus continuing to drive market change and increasing the demand for sustainable products in Canada and around the world. The UL ECOLOGO® certifications indicate that a product has undergone rigorous scientific testing, exhaustive auditing, or both, to prove its compliance with stringent, third-party, environmental performance standards.

UL ECOLOGO Certificates available on our website

environmental
impact.

MAKING SUSTAINABILITY A REALITY

Clean smarter, better and healthier with Dustbane's line of products with reduced environmental impact!

We are making a commitment with our customers in mind. Offering products with a reduced environmental impact will improve workers' health, safety and moral. With your support, this will work toward a greener and more sustainable future.

"Meeting today's needs without compromising the ability of future generations to meet their needs."

(Commission on Environment and Development, 1987)

Our products contain:

- No A.P.E. (Alkyl Phenol Ethoxylates)
- No E-glycol Ether
- No phosphate (limited in degreasers)
- No ammonia
- No or very low V.O.C (Volatile Organic Compounds)
- Low Packaging (Super Concentrates)
- Biodegradable
- No petroleum ingredients
- No EDTA/NTA (causes entrapment of heavy molecules)

Our floor pads have been validated as being made with 100% post-consumer recycled PET fibers.

**with the exception of our Dustbane-D pads.*

We believe in transparency so we disclose our ingredients. We examine the impact that our chemistry has on the entire environmental landscape. Our products are manufactured onsite allowing us to have full control of the ingredients used.
